### **Radiant RFID Installs Access Control Solution for Coach America**

San Antonio, TX – February 12, 2009 -- Radiant RFID today announced that Coach America, a leading provider of passenger ground transportation services, has implemented its Access Control Solution at the Probandt Lot in San Antonio, Texas.

Access Control was best suited to meet Coach's requirements for security and controlling entry to their lot location. Radiant's Access Control solution allows Coach to designate access permissions based on individual profiles and includes real time updating and reporting. Additionally, a rapid implementation was essential in order to meet timely and strategic requirements. Through Radiant's rapid deployment services, Coach was installed, trained and production ready in days.

"We are proud to be part of Coach's strategic objectives and to meet and exceed the quality requirements they had in place for suppliers," said Cynthia Rubio, President of Radiant RFID. "Coach, and its customers, will experience greater security and ease of access using the Access Control RFID solution we have developed. We are pleased to welcome Coach as a customer."

#### **About Coach America**

Coach America is the largest tour and charter bus operator and the second largest motorcoach service provider in the US surface transportation industry. Headquartered in Dallas, Texas, Coach America provides transportation services throughout the United States.
