Radiant RFID Installs Fire Safety Inspection Module for Texas State University

San Marcos, TX – April 12, 2009 – Texas State University-San Marcos, a multipurpose university established in 1899, has implemented Radiant RFID’s Fire Safety Inspection Module to track the inspection of fire extinguishers, safety signs and other types of safety equipment across its 457 acre, 225 building campus.

Radiant RFID’s Fire Safety Inspection Module, a component of the company’s Virtual Asset Tracker solution, was chosen to improve the inspection process of all campus safety equipment. The University needed to ensure that inspections were conducted on time and that results would be available electronically.

The Fire Safety Inspection Module made the inspection process faster and simpler. It moved Texas State from a manual, paper intensive process to a reliable application that saves time, reduces effort, and provides instantaneous reporting for internal requirements and outside audits.

“Our process has greatly improved now that we have implemented the Fire Safety Module. We save time, have increased accuracy, and can save money on insurance rates. We no longer need to climb on ladders to get numbers - which improves our own safety - and we don’t worry about people painting over our location tags. Using RFID has made things much better in all respects” said Bill Hollingsworth, Environmental Health and Safety Specialist. “Additionally, with instantaneous reports that are easy to generate we can now provide information to outside auditors electronically for any month.”

About Texas State University

Since 1899, Texas State University-San Marcos has evolved from a small teacher preparation institution to a major, multipurpose university. Through its nine academic colleges, Texas State offers nearly 200 undergraduate and post-graduate degrees to serve the needs of future generations of Texans. Texas State University-San Marcos is dedicated to excellence in serving the educational needs of the diverse population of Texas and the world beyond.

About Radiant RFID

Radiant RFID provides complete tracking and locating solutions using RFID technology. Headquartered in Austin, Texas, Radiant RFID’s customers include leading corporations, universities and government agencies. Radiant’s solutions are designed specifically around the areas of asset tracking, access control, and emergency management.
